

HXT HDD Drill Pipe

Extreme Torque for Extreme Demands

Interlocking Radial Shoulder – The positive locking shoulder increases bearing surface and reduces flaring of the box over conventional and OEM shoulder designs.

Load Flank Hooked threads – Offers increased torque capabilities versus typical HDD threads by reducing eccentric loading on the box.

HXT thread design – Allows for increased fluid flow capabilities.

Hunting HXT drill pipe is designed and manufactured to fit most makes and models of HDD including Ditch Witch®, Vermeer®, American Augers®, Astec Underground®, Universal HD™ and others. Please contact Hunting Trenchless for detailed specifications regarding Hunting Trenchless pipe products for your HDD equipment.

When the drilling gets tough, Hunting HXT drill pipe is just getting started. That's because HXT is engineered to be the toughest, longest-lasting pipe you'll ever drill with. Which is a pretty big statement, coming from the company that's been building drill pipe to the toughest standards in the industry for decades.

- Engineered and designed to fit 24,000 lb to 120,000 lb rigs with torque ranges of 3,300 ft/lb to 18,000 ft/lb
- Patented double-shoulder design can stand up to more torque than any other pipe in its class
- Rugged, industry-exclusive thread design can handle more load than any other pipe in its class
- Largest inner diameter in its class produces the increased fluid flow that large backreaming bores and mud motor applications demand
- Durable one-piece forged design eliminates joints and welds—the number-one source of pipe failure in competitive designs
- Crafted from a proprietary I-135 steel alloy that's engineered for durability and flexibility
- A full range of adapters and transition subs are available, so you can convert to long-lasting HXT pipe without reinvesting in downhole tools
- Hunting manufactures a full system of HXT downhole components—including saver subs, drive chucks, and drill pipe—that work together to give you the most productive bore possible
- Designed, manufactured, and tested by the company that's been producing drill pipe longer than anyone else
