

# ROCKNIFE™

## A CUT ABOVE THE REST.

NEW

### INTRODUCING HUNTING'S NEW AT HOUSING

Designed after Hunting's proven HDD mud motor technology, Hunting's all new Rocknife™ transmitter

# ROCKNIFE™

housing can withstand the toughest of conditions. The Rocknife™ uses **separate thrust AND radial bearings** for downhole forces, while competitive products use only radial bearings for handling multidirectional loads. Its 6-tab patent pending **LockingLid™** eliminates the need for threaded fasteners and specialty tooling. The Rocknife™ delivers the same **innovation and quality** you've come to expect from Hunting so you can drill with confidence.

- Thrust & radial bearings
- 6-tab patent pending LockingLid™ (No threaded fasteners)
- Compatible with most electronics
- Designed for 30,000 lb. rock drilling rigs
